

BNN TRAINING WORKSHOP ROSTER

Boston Neighborhood Network offers an array of media workshops to help you with your studio and field productions, as well as workshops and seminars exploring multimedia applications and social media. Our dedicated instructors are prepared to work with beginner, intermediate and advanced students. Our basic workshops are offered two or three times a year and our more advanced and special workshops are offered occasionally. Most workshops are hands-on but we do offer some seminars. We also offer special training for Youth and Seniors and we provide hosting training for *BNNLive* producers on a regular basis. There are prerequisites for some classes.

If you see a workshop on our roster that is not presently scheduled, let us know you are interested and we'll try to put a group together. If you are interested in something you don't see on our list - give us a call!
